## **The entrepreneur: from the hospital to the market**

On 5<sup>th</sup> March Ventura Medical Technologies participated in the 7th Annual Conference of Biomedical Research Technology Platforms together with ArgonPharma, Amadix, Biocat, Bioncotech and Vaxdyn. During this conference a panel discussion, entitled "Technology transfer and entrepreneurship from the National Health System", was organized by ASEBIO where different topics were exposed about entrepreneurship as innovative clinical concerns, face new challenges focused on improving the sustainability of the National Health System, synergies and challenges in the process of transfer between hospital and company, regulatory and administrative impediments to the Startups creation and cultural barriers in the opening of new markets.
